PROFESSIONAL EXPERIENCE

Software Engineer II, Paychex

Oct 2022 – Present | Charlotte, NC

- Use Typescript, StencilJs and React to produce a framework agnostic chat bot component library to internal consumers.
- Consistently outperformed sprint goals and expectations while providing oversight on transition from dynamically typed legacy project to a strongly typed library.
- Maintain app help drawer to ensure compatibility with other frontend components.
- Assist in development and maintenance of bot dialogue flows and other relevant Azure cloud services.

API Engineer, Ally

Apr 2022 – Oct 2022 | Charlotte, NC

- Utilize Typescript, Node.js, AWS, and GraphQL (Apollo) to develop a Graph middleware replacing a legacy REST product.
- Deliver business requirements and provide integration support to the frontend team to ensure a smooth transition.
- Work with a microservices team to layout a streamlined flow of data.
- Contributed to the team's CI/CD pipelines to ensure smooth production deployments.

Associate Application Developer, Charter Communications

Jul 2021 – Apr 2022 | Charlotte, NC

- Work with product managers and brand leadership to improve the performance of the websites and add new features as necessary.
- Assisted the transition from the legacy NodeJS REST API to a GraphQL client handling 150,000 requests a minute.
- Write API unit tests with complete code coverage.
- Create and update component based front end web pages and content using AngularJS and Less.
- Provide technical and programming support for integration between the websites and third party providers.
- Provide technical assistance and recommendations on process improvement.
- Produce and maintain written documentation of system information.
- Utilize Docker and Jenkins for automated and containerized deployments in code reviews.

Website Designer, Townsquare Interactive

Apr 2021 – Jul 2021 | Charlotte, NC

- Design 2-3 websites a day for client businesses looking to expand their online presence and reach using a proprietary CMS.
- Create graphics and logos for clients to use for ads and promotional materials using the Adobe Creative Suite.
- Effectively communicate with client-facing teams to deliver websites that meet custom client requests and specifications.
